JIBREEL INSTITUTE is the exclusive Arabic & Islamic Studies provider for adults at the prestigious London Muslim Centre (LMC). The Institute offers a curriculum of high quality classical and contemporary scholarship, with balance and creativity made accessible and affordable to all. Courses are organised on a semester basis, and classes are run separately for men and women.

For greater accessibility, courses are available during the working day, evenings as well as weekends. Intensive courses and seminars are offered at weekends and holiday periods. All our courses are taught by qualified scholars and teachers, who share a passion for the study and teaching of Arabic and the Islamic Sciences.

Tajweed

Tajweed in Arabic means to improve, enhance and to make better. When the term is used in relation to the Qur'an it means the knowledge and application of the rules of recitation, which is an obligation when reciting the Qur'an.

In this course students will learn how to recite and articulate every letter of the Qur'an from its articulation point (*Makhraj*) and how to give the letter its rights (*Haqq*) and dues of characteristics (*Sifat*).

With emphasis on practical learning under qualified supervision, students who successfully complete the Tajweed programme will be nominated to receive *Ijaza* (certification) in the recitation of the Qur'an.

LEVEL ONE

Level One Tajweed is for students who know the Arabic alphabets and are able to read Arabic.

Student on this level will be introduced to the science of Tajweed and *Qira'a* (recitation). They will be taught the common errors in recitation and will learn about the *Makharij al-Huruf* (points of articulation), and rules of *Isti'adha* and *Basmalah*.

Hadith

This course will cover in-depth the methodology and terminology of scholars of hadith in assessing such narrations and sifting the sound (*sahih*) from the weak (*da'if*), or fabricated (*maudu'*) etc. Topics include definitions of hadith, sunnah, grades of *isnad*, ranking of narrators, and transmission methods. This course is essential for general students of knowledge as well as those aspiring to pursue formal hadith or shariah sciences.

In addition to the main teaching text, Arabic grammar, syntax and morphology will be covered as appropriate in each level.
